

Jessica Caporale and Jay Brancati, Vice Presidents, Foxon Park Beverages

The taste is pure and natural.  
The thirst is all in the family.  
**The difference is in the RWA's water.**

For over a century, we haven't changed the base of our soda's formula. And, after all that time, our beverages are always in good taste. **Regional Water Authority (RWA)** water is one of the primary ingredients. Its soft water characteristics are an important part of our sweet success.

The RWA has invested a lot in its water resources and infrastructure for this region. Few places have tap water of this high quality that is also reliable and affordable. Our iconic soda pop still uses a recipe from generations ago, and the RWA's water has helped Foxon Park stay true to taste and tradition.

 **Regional Water Authority**  
Tapping the Possibilities™
