SAFETY MOMENT

DRIVING IN SUN GLARE

Account for time of day

Sun glare tends to be the worst in the early morning and late afternoon. Drivers should be mindful of the potential for glare.

Use polarized sunglasses

Polarized glasses have been popular for years among boaters and fishermen who need to reduce the glare from the water. They offer less eye strain and strong protection from both UVA and UVB rays.

Use the sun visor

It sounds basic, but you can block out the harshest rays of the sun by using your car's sun visor. Be aware that a visor can also reduce overall vision.

Slow down and leave more room

Your visibility and reaction time will decrease due to glare, so it's important to give yourself a greater gap to react.

Use your headlights

This makes you more visible to other drivers.

Clean your windshield

Spots and debris on your windshields can make it even more difficult to see in sun glare situations.

Tap Into
Safety

Regional Water Authority

Service – Teamwork – Accountability – Respect – Safety

Safety is a core company value at the Regional Water Authority .
It is our goal to reduce workplace injuries to zero.
