## Mitigating the Risk

Confidential Information - For Board Use Only - Do not Redistribute
Summary

• Top Ten Risks remained consistent, with significant mitigation of gross risk

• The cross-functional Risk Mitigation Committee focuses on identifying risks and their mitigation
  - Advises on new and emerging risks
  - Updates current risks
  - Solicits input from Risk Owners
  - Integrates w/Business Continuity Committee

• Future tasks include incorporating AWIA assessment, new perspectives, and addressing new challenges
Appendix

Definitions of Gross, Current and Residual Risk

**Gross Risk** – The risk consequence assigned to a given aspect of business, prior to the effects of active mitigation, but reflecting the environment within which the business exists.

**Current Risk** – The risk consequence assigned to a given aspect of business, as a result of existing controls.

**Residual Risk** – The risk consequence assigned to a given aspect of business when all mitigation and positive efforts by management and others are in place.

Definitions of Impact and Probability

**Impact**

**High** – An event that will result in a fundamental strategic realignment of operations. A threat to the continuation of business. **Rating – 4 to 5**

**Medium** – An event that can be handled within the confines of the business, where third parties may be affected and resulting in a financial or operational impact. **Rating – 3**

**Low** – An event that can be managed within the day to day financial and operational business, while providing business as usual **Rating – 1 to 2**

**Probability**

**High** – Event expected to occur (i.e. highly probable that event will occur) in the current or next business period (1 year). **Rating – 61% to 99%**

**Medium** – Event expected to occur (i.e. highly probable that event will occur) during the strategic planning period (2 – 5 years). **Rating – 41% to 60%**

**Low** – Event is possible but Management does not reasonably expect it to occur within the current environment. **Rating – 1% to 40%**

Calculation of Risk Level

**Risk Level = Impact multiplied by Probability**

- 1.0 = Low……………… (Insignificant)
- 2.0 = ………………… (Minor)
- 3.0 = Medium………… (Moderate)
- 4.0 = ………………… (Major)
- 5.0 = High……………. (Worst Case)

**Future Action based upon Risk Level**

If Risk Level is less than or equal to 2.5, keep on watch list

If Risk Level is greater than 2.5, more mitigation needed
